

13.03.2012 № 120313-A01

Regarding the support of the nongovernmental YACONTO Integrated investment Program, included in the YACONTO International Program of planetary scale through the implementation of Project-A for the restoration of the status quo of Atomash OJSC (Volgodonsk, Rostov region)

**To the Deputy
of the State Duma
of Federal Assembly
of Russian Federation
V.B. SHESTAKOV**

Dear Vasily Borisovich !

Throughout your career as Deputy of the State Duma of Federal Assembly of Russian Federation of Fifth Convocation you supported YACONTO LLC (Russia, Moscow) in the implementation of the unprecedented nongovernmental YACONTO Integrated investment Program for the solution of transport issues in Southern Russia by constructing a “Commercial Black Sea port YACONTO” for the handling of over 100 million tons of cargo per annum with respective production and transport infrastructure in Tuapse region of Krasnodar Territory. The YACONTO List of Projects of 09.05.2005 also includes the establishment of a Tuapse Naval Base as a main or backup stationing point for the Russian Black Sea Fleet in the event of partial or complete withdrawal of ships from Sevastopol (Ukraine).

Active opposition from the Russian bureaucrats to the implementation of the YACONTO Integrated Program complicates Russia’s already thorny relations with world’s leading nations who would be interested in having long-term mutually beneficial partnership with Russia, whose economy continues to be directly dependent on world prices for crude oil and gas. The implementation of the YACONTO Integrated Program will allow Russia to prove in practice to EU, OSCE, WTO, NATO and other economic alliances and military-political blocs its true partnership in geo-economics and geopolitics on conditions of trust to the parties concerned.

According to four Orders of the Russian President D.A. Medvedev: from 29.06.2010 № Pr-1883, from 21.08.2010 № Pr-2448, From 19.05.2011 № Pr-1413 and from 08.07.2011 № Pr-1948 and the Order of the Russian Prime Minister V.V. Putin № VP-P7-4798 from 13.07.2011, the law enforcement and supervisory authorities continue the verification of intentional bankruptcy and liquidation of Atomash OJSC (Volgodonsk, Rostov region), the flagship of Russian nuclear engineering, where the State had a 30% stake. However, the verification is being opposed by officials and their accomplices who took part in an anti-state crime, undermining the economic security of the country.

Concern YACONTO JSC (Russia, Moscow) owned a 28.5% share in Atomash OJSC, therefore, as a result of the intentional bankruptcy of the latter, both the State and Concern YACONTO JSC (the successor of which is YACONTO LLC) were illegally deprived of their property.

One of the key facilitators of the bankruptcy of Atomash OJSC was its Bankruptcy referee A.Y. Stepanov who was arrested in Moscow on 02.02.2011 on charges of large-scale fraud with the loans issued by the Sberbank of Russia and is currently still under investigation in prison. Although A.Y. Stepanov escaped punishment for a similar offence related to a major loan taken from a foreign bank, he was nevertheless sentenced in absentia by the High Court of Justice (London) for two years in prison and full payment of the debt on terms of the suit of the bank.

In order to solve the problem of returning the property, expropriated illegally from the State and thousands of shareholders during the deliberate bankruptcy of Atomash OJSC that took place in 1995 - 1999, YACONTO LLC developed the Project-A, implementation of which will provide a successful solution of problems and challenges faced by Russia in the interests of the state, society and business. Implementation of Project-A will restore the status quo of Atomash OJSC and bring back 30% of its shares to the State; the perpetrators will compensate the claimants for their losses both in Russia and abroad; the State will accumulate the controlling stake in Atomash OJSC through exchanging 28.5% shares owned by YACONTO LLC for property agreed with the investors and partners; all payables to third parties will be paid; the State accumulated interest in Atomash OJSC and other assets may be transferred to entities authorized by the state to carry out the development of nuclear engineering and implementation of socio-economical development in Russia and abroad.

In case the supreme leadership of Russia supports the implementation of Project-A, foreign strategic partners of YACONTO LLC will attract investments worth 1.3 trillion U.S. dollars for the implementation of a multi-industrial YACONTO International Program of planetary scale which consists of promising, highly efficient projects and programs. YACONTO Integrated Program in Southern Russia is also a part of it.

More detailed information and numerous documents regarding the activities of YACONTO LLC (Russia, Moscow) are published on: www.yaconto.ru.

In order to strengthen international relations and economic ties between Russia and the World's leading nations **I kindly ask you to address the Ambassador Extraordinary and Plenipotentiary of the Russian Federation in the United Kingdom of Great Britain and Northern Ireland, A.V. Yakovenko with the above-justified proposal to meet with the western business elite and influential people who are interested in the implementation of the YACONTO Integrated Program and with persons authorized by YACONTO LLC.**

Attachment: A set of documents.

(The Russian text of this letter is an original.)

Respectfully yours,

President of YACONTO LLC

S.P. YAKUNIN
